DETAILED ACTION

Allowable Subject Matter

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by the Japanese publication (Japan). As acknowledged in the first two pages of the specification, Japan shows the use of an angle sensor in a jaw crusher. This sensor is mounted on the toggle block which is mounted on the frame i.e. the sensor is indirectly mounted on the frame which meets the claimed subject matter.
